

Brno, 8 January 2021

Change in TECHAGRO and ANIMAL TECH dates

Dear exhibitors,

due to the ongoing unfavourable epidemic situation and government measures that do not allow the holding of mass events, and the persisting uncertainty about further development, the management of Trade Fairs Brno agreed with partner sectoral associations to cancel the **TECHAGRO, SILVA REGINA and BIOMASS 2021** fairs and hold them **from 3 to 7 April 2022**.

We have also agreed to **postpone ANIMAL TECH, the National Show of Livestock and the National Hunting Exhibition to 27-30 June 2021**. Both events thus return to their previous two-year periodicity and rotation of industry-oriented trade fairs for crop production and forestry in even years, and trade fairs for animal production in odd years.

ANIMAL TECH, the National Hunting Exhibition and the National Show of Livestock will be expanded with the possibility of exhibiting, by way of exception, agricultural machinery for plant production and forestry, so that the presentation will be made possible for the interested exhibitors of TECHAGRO this year as well.

For more information, see the press release attached.

In the following days, you will be informed about the following steps and our team will sort the administrative issues related to the above change with you.

We believe that further development of the situation in the coming months will already allow for the start of the expo season at the Brno Exhibition Centre.

We are looking forward to meet you in person.

Best regards,

Jan Kuběna
Business Director
